Safox

Junior .Net Software developer

Safox is a RiskMatrix company. Safox offers an all encompassing guarding software. As a software developer I offer support for its many users, including bugfixes and expansions of the application itself, based on demand of each client. Safox is based on .NET MVC, It uses SQL for storing data and HTML/CSS/JavaScript in the frontend.

february - june2022

Krachtig Online

Front end developer

During my Thomas More graduate programming course, I did an internship at the company Krachtig Online. Here I mainly learned to work with WordPress. I have developed several projects for several clients, I mainly created websites during this internship.

Achievements

AZ 900 Fundamentals certificate

I have achieved getting my Azure 900 Fundamentals certificate. I learned the basic of Azure and its services and I managed to develop a good basic understanding

Udemy - .NET Core MVC Course

I completed this full e-commerce .net core .net8 MVC course, presented by Bhrugen Patel on Udemy. Where I refreshed and improved my skill through making an entire application.
