About me

Hi, I'm Robin Ceustermans, a driven software developer who's always eager to learn and grow. My expertise is primarily in C#, .NET Core MVC, HTML/CSS, and JavaScript, but I'm always excited to learn new technologies and expand my horizons. I enjoy working with tools like GitHub and Scrum, and I'm familiar with design software such as Figma and draw.io.

Outside of work, I'm a football fan and I support Racing Genk since I was a kid. I also love gaming on various platforms, including PC, Nintendo and PlayStation and I like going to the gym.

Experience

.Net Software developer

Safox

September 2022 - August 2024

Safox is a RiskMatrix company. Safox offers an all-encompassing guarding software. As a software developer, I offer support for its many users, including bug fixes and expansions of the application itself, based on the demands of each client. Safox is based on .NET MVC. It uses SQL for storing data and HTML/CSS/JavaScript in the frontend.

Front end developer

Krachtig Online

February - June 2022

During my Thomas More graduate programming course, I completed an internship at the company Krachtig Online. Here, I primarily learned to work with WordPress. I developed several projects for various clients, mainly creating websites during this internship.

Achievements

AZ 900 Fundamentals certificate

I independently earned my Azure 900 Fundamentals certificate. I learned the basics of Azure and its services and developed a good understanding.

Udemy - .NET Core MVC Course

I completed this full e-commerce .net core .net8 MVC course, presented by Bhrugen Patel on Udemy. Where I updated and improved my skill by making an entire application.
